Subject: Cornish Library & Community Center - RFI007 - Low CMU Foundation Wall
Attachments: RFI007 - Low CMU Foundation Wall.pdf

Good morning, Miles,

I'm looking for confirmation that the CMU wall along the north elevation that we reviewed in field last week is intended to stay. I just sent out a formal RFI in Procore to document the condition but wanted to follow up in this email as I have the site work team on the job today.

During our walk you indicated that it should remain, which we don't see posing an issue.

I've attached the pdf included in the Procore RFI.
